

Telling Your Story Workshop

Planning Questions for Teachers and Scientists

Questions for Teachers:

- How will you prepare students to take full advantage of the visit?
- How will you follow up with the students after the visit so they can take full advantage of the visit?

Questions for Scientists:

How will you convey to students:

- How you became interested in science?
- What it is you love about science?
- Why you consider your work important?
- How you arrive at your research questions?
- How you organize yourself and a team to pursue an extended investigation?
- How you gather evidence to help answer your research questions?
- How you use evidence to construct a scientific explanation?

Questions for Teachers and Scientists:

- How will you work with each other to make sure that students learn about the importance of studying and protecting the Earth, the nature and excitement of research, and are motivated to continue their study of science?
